**Subject:** RE: SW Intakes

Jon,

Per the City of Houston water system, the “intake” at the Buffalo Bayou & San Jacinto Battleship grounds (off of I-10) is operated by the East Water Treatment Plant. (The City has three water treatment plants: a Northeast plant, East plant, and Southeast plant).

The East plant pulls water from the Lynchberg Reservoir, which is pumped in from the Trinity River. The operators are monitoring the finished water there daily. The City has not received any public complaints and does not anticipate any drinking water impacts as a result of the ITC Deer Park fire.

Thanks.
